

Garage door operators

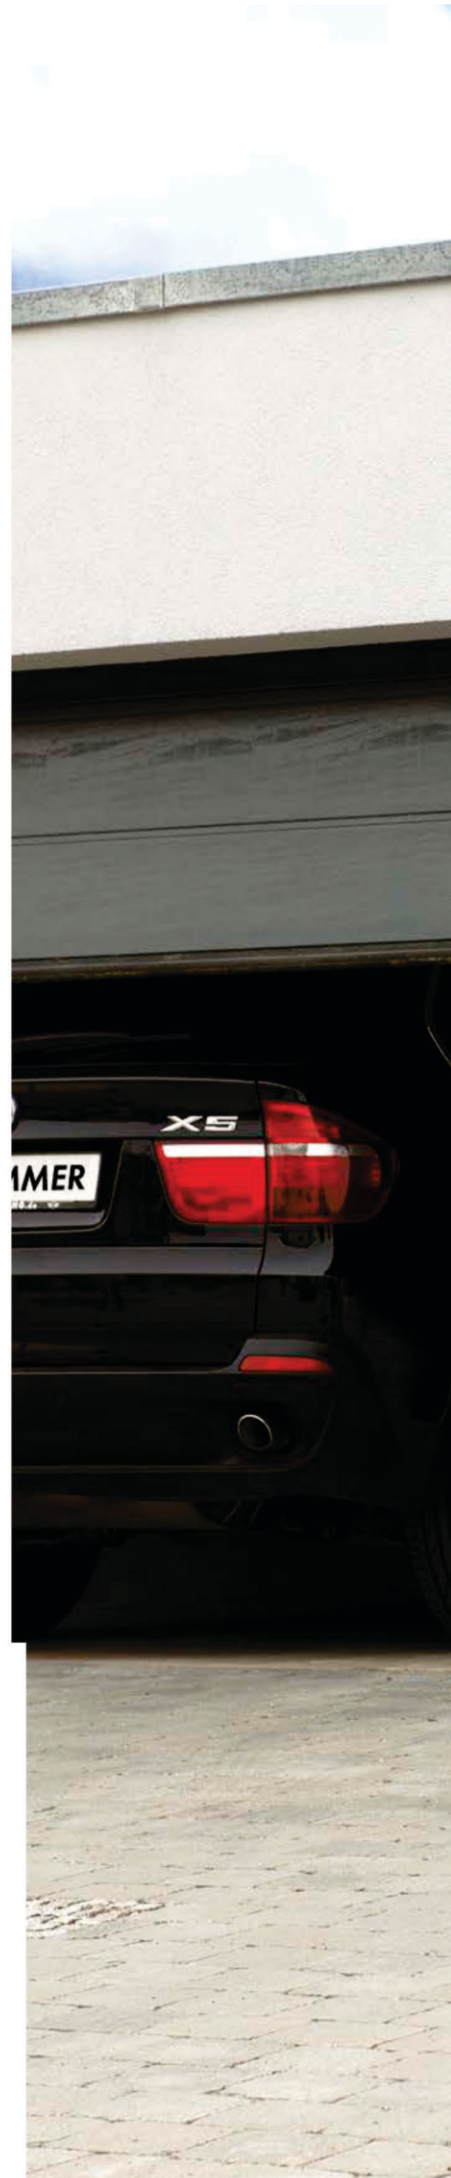

Reliable and convenient access in the garage

GARAGE DOOR OPERATORS: **GEAR SAVING** TECHNOLOGY WITH HIGH DURABILITY AND LOW WEAR

[POWERFUL, SAFE, RELIABLE]

Depending on the type and size of your garage door, you can find the appropriate garage door operator for your door system and requirements from Germany.

LONG-LASTING THANKS TO THE TRAVELLING MOTOR

All of our garage door operators are equipped with the travelling motor operator system developed by CONCORD. This reduces wear, lengthens the operator lifetime and ensures operation is as smooth as possible.

□□□

□□

□□

The motor track carriage moves itself along a permanently tensioned chain so that no frictional loss and no loss of power occurs as does with an operator with a revolving chain.

□

Chain:

- High-quality chain
- Wear- and maintenance-free, pre-tensioned via springs with high tensile strength

□□

The door can be locked and unlocked easily in every position. This makes it possible to open the garage even in the event of a power failure.
